設問 5. 30 点 解答例 英作文力

1. Almost every president since Nixon have proposed a return to the moon.

“Congress decided we couldn’t have guns and the moon at the same time.” The U.S. government was always spending money on wars or some kind of emergency, so that money was not available for another trip to the moon.

2. In the 1960s the U.S.A. was in a space race with the Soviet Union; it was the time of the Cold War. American goals were political and the U.S.A. accomplished the goal of getting to the moon before

the Russians. Now technology has tremendously advanced and we have both scientific and business objectives. There are various possibilities that the moon offers us such as the following:

becoming a way station for launching rockets and satellites into the solar system

lunar construction projects, including a tele-robotics lab

the possibility of mining water and precious materials

space tourism – though scientists are skeptical

3. The space race with the Soviet Union in the Cold War, specifically, the fact that the Soviet Union was winning the space race with the first satellite and the first astronaut in space.

The American Congress was spending money on other things such as defense, and America had accomplished its goal of winning the space race against the Russians by putting men on the moon.
